<u>Firmware GW</u> File: ictgw_v770_rc08.fwr	

List of bug fixing and changes from Release 7.67 to Release 7.70

Nr.	Changes / Bugfixing
New features in the system	
1.	Support the new System-Telephones <i>elmeg S530</i> / <i>elmeg S560</i> and the key extension module <i>elmeg T500</i> at the ICT-PBX's.
Bugfixing System	
2.	ARS 15224: Sometimes it was not possible to clear call forwarding from a TAPI application. This had to be done via the respective terminal.
3.	ARS 17734: In the PBX-Edit-Menu „Holidays“, the deletion of characters was not executed correctly.
Bugfixing VoIP Gateway	

4.	ARS 16534: Wrong time calculation in the leap year on February 29th.
5.	ARS 17653: Closing of the security hole: SIP terminals could setup calls without registration.
