

# User Manual

## A Detailed Guide to the Technology and Configuration of Bintec Gateways

The User Manual is a comprehensive reference to networking technologies used in Bintec gateways. In this set of documents, every effort is being made to reflect the latest technologies and features implemented. Existing documents in this set are under constant revision, while new documents are steadily supplementing the list. There is a conceptual and structural division between the two sections of this book. The first set of documents under **Basics** contains all information required for a standard configuration of the gateway. The second part of the User Manual **Technical Reference** provides detailed information for specific applications.

Click on the required chapter in the list to open the respective file.

### Basics

- Quick Install Guide
- Technical Data
- Access & Configuration
- Glossary

### Technical Reference

- [www.bintec.net](http://www.bintec.net) - You can find the Technical Reference in the download section of our online presence.

## Purpose

This manual provides a description of the system software for all Bintec gateways.

## Liability

While every effort has been made to ensure the accuracy of all information in this manual, Bintec Access Networks GmbH cannot assume liability to any party for any loss or damage caused by errors or omissions or by statements of any kind in this document and is only liable within the scope of its terms of sale and delivery.

The information in this manual is subject to change without notice. For additional information, including changes to this document, please refer to the most recent version of this document and/or separate Release Notes which can be found at [www.bintec.net](http://www.bintec.net).

As a multiprotocol gateway, the Bintec gateway sets up WAN connections in accordance with the system configuration. To prevent unintentional charges accumulating, the operation of the product should be carefully monitored. Bintec Access Networks GmbH accepts no liability for loss of data, unintentional connection costs and damages resulting from unsupervised operation of the product.

## Trademarks

Bintec and the Bintec logo are registered trademarks of Bintec Access Networks GmbH.

All other product names and trademarks mentioned are the property of the respective companies and manufacturers.
