User's Guide

bintec R3000w / R3400 / R3800

GRE

Purpose	This document is part of the user's guide to the installation and configuration of Bintec gateways running software release 7.1.4 or later. For up-to-the-minute information and instructions concerning the latest software release, you should always read our **Release Notes**, especially when carrying out a software update to a later release level. The latest **Release Notes** can be found at www.bintec.net.
Liability	While every effort has been made to ensure the accuracy of all information in this manual, Funkwerk Enterprise Communications GmbH cannot assume liability to any party for any loss or damage caused by errors or omissions or by statements of any kind in this document and is only liable within the scope of its terms of sale and delivery.
	The information in this manual is subject to change without notice. Additional information, changes and **Release Notes** for Bintec gateways can be found at www.bintec.net.
	As multiprotocol gateways, Bintec gateways set up WAN connections in accordance with the system configuration. To prevent unintentional charges accumulating, the operation of the product should be carefully monitored. Funkwerk Enterprise Communications GmbH accepts no liability for loss of data, unintentional connection costs and damages resulting from unsupervised operation of the product.
Trademarks	Bintec and the Bintec logo are registered trademarks of Funkwerk Enterprise Communications GmbH.
	Other product names and trademarks mentioned are usually the property of the respective companies and manufacturers.
Copyright	All rights are reserved. No part of this publication may be reproduced or transmitted in any form or by any means – graphic, electronic, or mechanical – including photocopying, recording in any medium, taping, or storage in information retrieval systems, without the prior written permission of Funkwerk Enterprise Communications GmbH. Adaptation and especially translation of the document is inadmissible without the prior consent of Funkwerk Enterprise Communications GmbH.
Guidelines and standards	Bintec gateways comply with the following guidelines and standards:
	R&TTE Directive 1999/5/EG
	CE marking for all EU countries and Switzerland
	You will find detailed information in the Declarations of Conformity at www.bintec.net.

How to reach Funkwerk Enterprise Communications GmbH

Funkwerk Enterprise Communications GmbH Suedwestpark 94 D-90449 Nuremberg Germany	Bintec France 6/8 Avenue de la Grande Lande F-33174 Gradignan France
Telephone: +49 180 300 9191 0 Fax: +49 180 300 9193 0 Internet: www.funkwerk-ec.com	Telephone: +33 5 57 35 63 00 Fax: +33 5 56 89 14 05 Internet: www.bintec.fr

1 GRE Menu

The *GRE* (Generic Routing Encapsulation) menu is described below.

```
R3000w Setup Tool               Funkwerk Enterprise Communications GmbH
[GRE]: Configure GRE Tunnels                                  MyGateway

  Name        IP dst addr    IP src addr   Mtu     Key
  GRE Tunnel  56.56.56.56    56.56.56.55   1450    not used

    ADD                 DELETE              EXIT

```

The *GRE* menu shows a list of all configured GRE tunnels. (The display contains example values.)

The specification of the GRE protocol is available in two versions: GRE V.1 for use in PPTP connections (RFC 2637, configuration in the *PPTP* menu) and GRE V.0 (RFC 2784) for general ➤➤ **encapsulation** using GRE.

In the *GRE* menu you can configure a virtual interface for using GRE V.0. The data traffic routed over this interface is then encapsulated using GRE and sent to the specified recipient.

The configuration is made in *ADD/EDIT*.

```
R3000w Setup Tool            Funkwerk Enterprise Communications GmbH
[GRE][ADD]: Configure GRE Tunnels                          MyGateway

   Name                      GRE Tunnel
   GRE Partner's IP Address  56.56.56.56
   GRE Local IP Address      56.56.56.55
   Partner's LAN IP Address  192.168.100.0
   Partner's LAN IP Mask     255.255.255.0
   Mtu                       1450
   Key Used                  no

            SAVE                              CANCEL

```

The menu consists of the following fields:

Field	Description
Name	Name of the virtual interface.
GRE Partner's IP Address	➤➤ **IP address** of the GRE partner.
GRE Local IP Address	Source IP address of the GRE packets to the GRE partner. If no IP address (this corresponds to IP address 0.0.0.0) is given, the source IP address of the GRE packets is selected automatically from one of the addresses of the interface via which the GRE partner is reached.
Partner's LAN IP Address	Destination IP address of the host or network to which the packets are to be sent through the GRE tunnel.
Partner's LAN IP Mask	Netmask for *PARTNER'S LAN IP ADDRESS*.

Field	Description
Mtu	Maximum packet size (Maximum Transfer Unit, MTU) in bytes that is allowed for the GRE connection between the partners. Possible values are *1* to *8192*. The default value is *1500*.
Key Used	Activation of a key for the GRE connection, which makes it possible to distinguish between several parallel GRE connections between two GRE partners (see RFC 1701). Possible values: ■ *no* (default value): Key not activated. ■ *yes*: Key activated.
Value	Only for *KEY USED* = *yes*. Value of GRE connection key. Possible values are *0* to *2147483647*.
