Read Me
Release 2.11.6
elmeg IP620 und elmeg IP630

1. What is new?

- Added audio Codec G.729 A/B
- Support of *Event:check-sync; reboot=true*
- Long Press (LG) functions for keys 1-4 (Quick Dial, FAC, Action URL)
- Tuned function of FK „DND"

2. Enhancements

- Provisioning Timer setup for nightly provisioning
- [Phone UI] displaying of SIP messages
- Distinctive ring improvement to support more platforms
- [Door Call] No automatic disconnect after Door Opener
- Possibility to "Transfer" via softkey during Ringing State

3. Bug fixes

- Event Registration successful does not work
- Ringtone stops playing after a while
- Sometimes there is no possibility to access Web UI after FW update
- elmeg IP620 / elmeg IP630 freezes on connecting corded headset (Headset Hardware related)
- Kwebbl - SRTP after 200 OK
- IP Connection - SRV buggy usage
- [Call Divert] There is no possibility to enter phone number while activating Call Divert first time
- Codec negotiation fails
- Polish character not displayed properly
- Reboot after call transfer before answer
- elmeg IP620 / elmeg IP630 is crashing in Net Directory
- Hands free button remains active after call is ended

4. Known Issues

- Bluetooth headset using USB plug not supported
- We recommend setting and assigning the codec profile "quality" for **elmeg IP620 / elmeg IP630** on be.IP series devices in PABX mode, elmeg hybird 1x0 devices and elmeg hybird 120 Gigaset Edition.
