System Software 2.4.2.1

1	Release 2.4.2.1	2
1.1	Note	2
1.2	New Features.....	2
1.3	Known issues.....	2

1 Release 2.4.2.1

1.1 Note

This version is only available for the W2022ac/W2022ac-ext devices. To install Release 2.4.2.1 it is necessary that Release 2.4.1.1 is already installed on the access point.

1.2 New Features

- This release is functionally identical to release 2.4.1.1, but additionally enables the administration of the access point by **be.SDx**. Thus, **W2022ac** can be managed via its own GUI, the WLAN controller or via **be.SDx**.

1.3 Known Issues

- Release 2.4.2.1 cannot currently be installed via the bintec update server.
