# Software Reference

**A detailed technical guide to the technologies and configuration of BinTec products.**

The Software Reference is a comprehensive reference to networking technologies used in BinTec products. In this set of documents, every effort is being made to reflect the latest technologies and features implemented. Existing documents in this set are under constant revision, while new documents are steadily supplementing the list. There is a conceptual and structural division between chapters of this book. The first installment in a new-look, user-friendly online Software Reference is the chapter on Virtual Private Networking. All subsequent texts will be written in this manner and will place increased emphasis on accuracy, clarity and specific configuration scenarios. Eventually, all texts written in the old style will be revised and presented in the new format.

■ Introduction	■ Telephony Services	■ X.25
■ The BinTec Router Features	■ CAPI Information Values	■ Frame Relay
■ The SNMP Shell	■ Ethernet Framing	■ IPSec
■ ISDN	■ ISDN Error Codes	■ H.323, deutsch
■ System Administration	■ Syslog Messages	■ H.323, english
■ IP	■ OSPF	■ Glossary of Networking Terms
■ Bridging	■ RADIUS	
■ IPX	■ TAF	
■ CAPI Server	■ Virtual Private Networking

### Purpose

This manual provides a description of the system software for all BinTec routers.

### Liability

While every effort has been made to ensure the accuracy of all information in this manual, BinTec Communications AG cannot assume liability to any party for any loss or damage caused by errors or omissions or by statements of any kind in this document and is only liable within the scope of its terms of sale and delivery.

The information in this manual is subject to change without notice. For additional information, including changes to this document, please refer to the most recent version of this document and/or separate Release Notes which can be found at [www.bintec.net](http://www.bintec.net).

As a multiprotocol router, the BinTec router sets up WAN connections in accordance with the system configuration. To prevent unintentional charges accumulating, the operation of the product should be carefully monitored. BinTec Communications AG accepts no liability for loss of data, unintentional connection costs and damages resulting from unsupervised operation of the product.

### Trademarks

BinTec and the BinTec logo are registered trademarks of BinTec Communications AG.

All other product names and trademarks mentioned are the property of the respective companies and manufacturers.

### Copyright

All rights are reserved. No part of this publication may be reproduced or transmitted in any form or by any means – graphic, electronic, or mechanical – including photocopying, recording in any medium, taping, or storage in information retrieval systems, without the prior written permission of BinTec Communications AG. Adaptation and especially translation of the document is inadmissible without the prior consent of BinTec Communications AG.
