System Software 7.6.2 PATCH 2

This version of our system software is available for the following gateways:

- **Wxxx2 Series**
- **Wlxxxx Series**

The following changes have been made:

1.1 Reboot

(ID n/a)

After an update to system software 7.6.2 PATCH 1, accumulating unanswered DNS requests could lead to a reboot.

The problem has been solved.

1.2 DNS - Vulnerability

(ID n/a)

Our system software was vulnerable to so called "out-of-bailiwick attacks" which could allow an attacker to poison the DNS cache on our devices.

The problem has been solved.
